**ChargerHelp!** is getting EV charging stations and people back to work.

ChargerHelp! operates at the intersection of clean technology and workforce development. ChargerHelp!’s app-based dispatch and deployment system addresses the industry-wide problem of down electric vehicle charging stations by providing on-demand repairs and maintenance support from trained and supported local workforces.

This capability, provided at scale, is essential to support the exponential growth in EV charging infrastructure over the next decade, and it dramatically improves efficiency, turnaround time, and network availability while reducing costs across the networks. With the ChargerHelp! service offering, partner EV charging network operators can meet new service level requirements and win new EVSE contracts to meet the exponential growth in charging demands. The ChargerHelp! app is launched, technicians are in the field in its first market, and they’ve secured contracts with several large EVSE networks. ChargerHelp! has a diverse, female-led founding team, and is launching into 6 new markets this year; New York, Colorado, Texas, Florida, Northern California, and Washington.
ChargerHelp! Fact Sheet*

2020 Achievements:

- **January**: Company launched
- **October**: App built on Now Platform®
- **$500K +**: Booked contracts total in revenue
- **60 Technicians**: Trained in partnership with the Los Angeles Cleantech Incubator
- **$400K**: Secured in largely nondilutive funding, including $100K from ServiceNow’s Digital Workforce Challenge powered by MIT Solve, and ~ $100K in in-kind donations from ServiceNow employees to build our Gen 1 app

2021 Targets:

- **$1.5 million**: Seed round being raised
- **6 markets**: Scaling to NY, CO, TX, FL, WA and NorCal by the end of 2021
- **10,000**: Charging station contracts by the end of 2021

Community Impact:

- First-of-its-kind EV charging station maintenance curriculum
- Final phase of U.S. Department of Labor certification
- Coming soon to Community Colleges and Worksource Centers
- **8 year contract**, including preventative maintenance, under Southern California Edison’s Parks and Schools Program
- A portfolio company of both the Los Angeles Cleantech Incubator and Elemental Excelerator
