# Imagine the Possibilities

## SERVICENOW GOVERNANCE, RISK, AND COMPLIANCE

*Transform inefficient processes across your extended enterprise into an integrated risk program*

Did you know there is a better way to manage compliance and report status across departments, to the board, and external auditors?

Use continuous monitoring to track compliance and obtain actionable information to prioritize and respond to critical risks in real-time; while automating low-value tasks. Built on the Now Platform® for a truly unified solution.

### Control Risk Exposure

*Real-time dashboards and continuous monitoring provide actionable information about high-impact risks, vendor status, noncompliance, and significant audit findings.*

### Improve Decision Making

*Plan and make decisions more strategically with an asset-centric approach that uses context to assess business impact and appropriately prioritize activities – all in a single platform.*

### Increase Performance

*Automate tasks and orchestrate risk response with cross-functional process integration, reducing errors and freeing analysts to work on high-value tasks.*

### Improve your Risk and Compliance Posture

### Communicate Effectively
