

Now on Now

The path to ERP modernization

Challenge

Many technical organizations deploy customizations in the ERP ecosystem to enable the business to scale. However, this also makes it difficult to provide a commercial-grade experience, maintain ERP hygiene, and manage technical debt. These kinds of heavy ERP environments can slow the business down and divert critical investment dollars away from innovation.

Solution

By using digital discovery tools and the Now Platform®, organizations can realize a “clean core” ERP that supports greater business agility.

Find opportunities for improvement

Multiple Now Platform enablers

- 1 Purpose-built apps for quick wins
- 2 Pre-defined workflows to accelerate time-to-value
- 3 Low-code development tools that empower employees

ServiceNow outcomes

increase in productivity with AR case management solution

productivity gained from a newly built finance request tool

hours of manual effort avoided through master data automation

reduction in finance close cycle using automation and integrations
