

How to Resolve Real Security Threats Fast

1. Integrate Your Security Products

Use security integrations from ServiceNow to bring incidents from your existing security products into the platform.

2. Automatically Prioritize Security Incident

Based on business impact, automatically prioritize incidents in Security Operations and begin response workflow.

3. Utilize Threat Intelligence

Enrich security incidents with threat intelligence research to understand extent of problem and potential resolutions.

4. Determine Response Action

Leverage research to determine proper response actions and send prioritized tasks to IT via the security response workflow.

5. Remediate Threats Fast

Quickly perform remediation tasks for security incidents.

6. Review Post Incident Reports

Dynamically build post incident reviews for audit purposes and close the security incident.
