Build expertise and realize ROI faster
People are at the heart of your success. With training and certification, your teams will learn to master ServiceNow capabilities through hands-on, real-world instruction designed to help you meet your business objectives.

We provide support for each stage of your ServiceNow journey and for each role within your teams.
According to Gartner, one of the top five reasons that IT projects fail is inadequate change management and training.

- Average project success rate when 1.5% of project budget added for training: 80%
- More support is required for untrained users than trained users: 6X
- Of performance degrades after 4 years without ongoing training: 25%

“This training took me from being terrified of our upcoming implementation to being confident that our team can manage it.”

Hands-on Simulators

Go Further With Now Learning

Whether you are just starting out with ServiceNow or are brushing up on certain skills, Now Learning offers a more personalized experience. Choose your role specific certification path and experience hands-on live and on-demand classes.
Technical Training

What We Offer

Technical Training

WHO?
• Platform team members from IT and the business who will design, build, and maintain the platform
• Testers and super users

WHEN?
• Our expansive portfolio is appropriate for all enterprise maturity stages and personal skill levels

WHY?
• Participate effectively in workshops; decrease wasted time on knowledge transfer; enable platform ownership; realize the power of the platform

See the instructor-led training catalogue
What We Offer

Certification

WHO?
Technical platform users
• System Administrators
• Developers
• Implementers
• Application Specialists
• Business Process Analysts
• Master Architects

WHEN?
• After successfully completing associated courseware and hands-on experience

WHY?
• Increase expertise
• Support your ServiceNow platform with skilled and credible teams

Certification

Mainline Certifications
Indicates cross-product and role-specific knowledge and skills; available after training pre-requisites
Proctored, comprehensive exam

Delta Program
Verifies release-specific knowledge; available to individuals with current mainline certification
Non-proctored, short online quiz

Micro-Certifications
Indicates knowledge in and skill in a specific specialty; available after training pre-requisites
Non-proctored, mid-size online exam

Suite Certifications
Shows capabilities across product bundles
Achieved through combinations of Mainline and Micro-certifications

Mastery Programs
Indicates deep expertise in a complex, cross-product role; pre-requisites and application required
In-depth program and review board

Custom Training

WHO?
- Process users (fulfillers, ITIL users), process managers
- End users (employees, requesters)

WHEN?
- Material creation (in your instance) just before user acceptance testing (UAT)
- Delivery following UAT, just in time for Go Live

WHY?
- Avoid service disruption, drive platform adoption, increase customer satisfaction; accelerate time to value
What We Offer

Change Enablement

WHO?
- Enterprise-wide with a focus on sponsors, champions, platform teams, process users, and end users

WHEN?
- Part-time dedicated resource from project start (kick off) through training delivery (~20 weeks)

WHY?
- Plan for change and communicate effectively; bolster internal support for change; send the right people to the right classes; prepare students for training; create excitement and drive user adoption
